Your scores over time

Percentage of points on each marked practice session (612 points marked so far). Practice percentages are not test scores, but a rising line is the trend you want.

Strongest and weakest question types

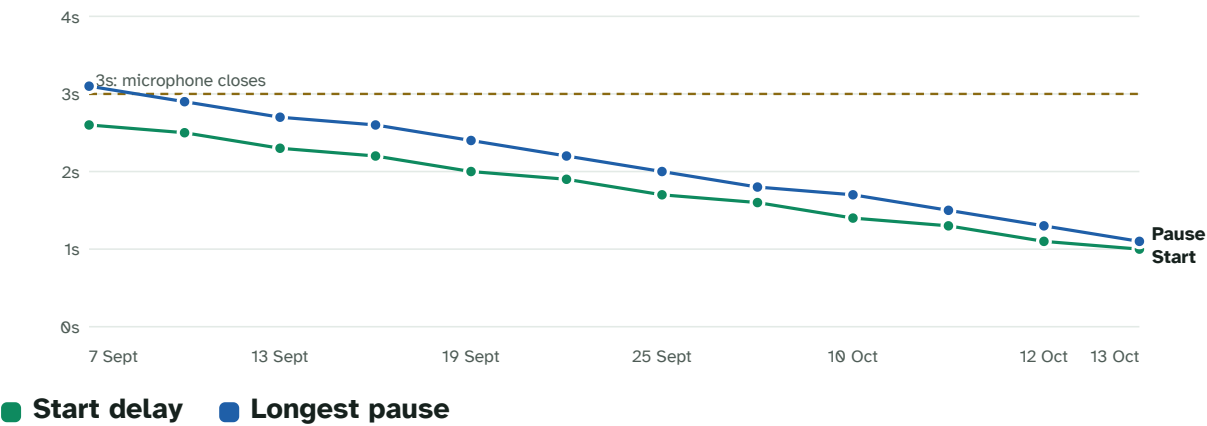

All your saved sessions combined, weakest first. Click a question type for tips.

Practise next: [Reading & Writing: Fill in the Blanks](#), [Reorder Paragraph](#), [Write from Dictation](#). Small gains on your weakest types usually lift the overall score fastest.

Speaking fluency

Average seconds before you started speaking, and your average longest pause, per session. Lower is better for both. In PTE, 3 seconds of silence closes the microphone.
